

Mobile SCBA and Equipment Service Unit

You want only the best when it comes to the safety equipment lives depend on; Not only yours but the crews that work with you and the people you serve. So, why not have your equipment serviced by a company with years of experience?

Operating the service unit is **Bob Fuss**. Having served over 25 years in the Fire Service, both as a Firefighter and a Service Technician, Bob is the Technician you want working on your life saving equipment.

Front Range Fire Apparatus offers a **Mobile SCBA Equipment Service Unit**. This unit is available to come to your location to perform the following services:

- *Cylinder Hydrostatic retesting
EDDY Current Testing*
- *Self Contained Breathing Apparatus Flow and Function Testing*
- *Breathing air quality testing for air compressors and/or cascade systems*
- The listed services can be done at your location, preventing the need to ship your equipment out for service.

Front Range Fire Apparatus is an Authorized **MSA** Service Center.

Did you Know?

- NFPA requires Self Contained Breathing Apparatus to be Flow/ Function tested annually.
- United States Department of Transportation requires that Air Cylinders be Hydrostatic tested every 3 or 5 years depending on the type of cylinder.
- EDDY Current Testing on Aluminum Cylinders and is now required by U.S. D.O.T.

Is your equipment testing up to date? Are you in compliance with the Standards and Laws? **Front Range Fire Apparatus** can assist you with this and they will bring the service to your location.
